

# MOHAMMAD KIZAWI

## FULL STACK DEVELOPER

### CONTACT

 +40724952701  
 mohammad.kizawi@gmail.com  
 <https://mohammad-portfolio>  
 Salzburg, Austria

### SKILLS

Html, CSS/SCSS, Javascript, Typescript, React, Mobx, bootstrap, GIT/GITHUB, APIs, Mongo BD, nodeJS/express, Responsive designs, animation, Figma, Photoshop, Team Collaboration

### EDUCATION

#### Computer Science

#### West University of Timisoara

Romania - Timisoara  
2021-2024

Successfully completed a Bachelor's degree in Computer Science in Romania, specializing in web development and full-stack technologies

#### Johannes Kepler University

Austria - Linz  
2022-2023

Participated in a semester long Erasmus exchange program in Computer Science

### LANGUAGES

English   
Arabic   
Romanian 

### PROFILE

I am a **Computer Science** graduate based in **Romania**, currently working in **Austria** as a **web developer** with a passion for building **full-stack applications**. With hands-on experience in creating sophisticated web solutions, I've contributed to high-impact projects for industry leaders like KISKA, KTM, and GasGas. I bring ideas to life with elegant design, innovative solutions, and attention to detail. **Please click the link in the left bar to access my portfolio.**

### WORK EXPERIENCE

#### Frontend internship

Austria - Salzburg

KISKA

6 months

- Played an integral role in frontend development tasks, including building user interfaces, implementing responsive designs, and integrating frontend components with backend APIs using HTML, CSS, and JavaScript using React framework.
- Enhanced user experience through visually engaging UI components and high-quality animations, collaborating closely with designers to bring Figma and Photoshop concepts to life
- Built a robust internal inventory management application using React, TypeScript, and Golang, providing the team with efficient, real-time access to the company's inventory and transitioning processes from manual to automated tracking.
- Leveraged MobX for efficient state management and Git for version control, ensuring timely task submissions and smooth team collaboration.
- Conducted front-end testing with Selenium to validate functionality and improve application stability.
- Participated in weekly meetings with designers and developers to discuss project progress, align on development steps, and maintain consistent collaboration across teams.

#### Graduation Project: Movie Application with Chat Functionality

West university of Timisoara

Romania - Timisoara

- Developed a movie application using the MERN stack (MongoDB, Express, React, Node.js), integrating APIs to provide users access to a rich database of over 10,000 movies.
- Built a real-time chat feature with Socket.IO, enabling instant user communication.
- Designed a responsive, user-friendly interface that adapts seamlessly to various devices, optimizing usability.
- Developed user authentication to restrict access for unauthorized users, providing enhanced features for authenticated users.
- Implemented robust error handling for authentication and message delivery, enhancing user experience and reliability.
- Secured user data with encrypted password storage and established a secure database for storing messages and personal information.
